

MAKSIM GRIDNEV

AI-Native Product Designer: I create and improve digital products and interfaces

I design UX/UI, user flows and product structure, using AI at different stages of the work

I combine UX, UI and AI-assisted development to test ideas faster and turn them into working digital products

ABOUT

Design education: UpRock Design School, Google UI/UX Design

Product experience: designed digital products, websites and internal tools

I work with product structure, UX/UI, user flows, prototypes and design systems, balancing business goals and user needs

Business background: sales, team management, customer research, SPIN Selling and KPI-driven decisions

KEY SKILLS

Product and UX: Product Design, UI/UX Design, UX Research, User Flows, Information Architecture, Web Design, Design Systems, User-Centered Design

AI: Claude Code, Cursor, Figma Make, Vercel, Kimi, Midjourney, Nano Banana, Fidgetal+, Kling, Google Flow

Tools: Figma, Miro, Notion, Jira, Adobe Creative Suite

LANGUAGES

English — Pre-Intermediate
Russian — native

February 2026 — August 2026

AI-Native Product Designer · Respawn Esports

An esports organisation and digital platform focused on games, community and events

Product features: rebuilt the website from scratch, creating a more premium brand image and making it easier for users to interact with the organisation. Designed an admin console for managing bookings and users, so the team could handle bookings more efficiently

Metrics: user rating of **5**, bookings **+15%**, revenue **+18%** and repeat visits **+25%** thanks to the website redesign, better advertising integrations and new food and hookah delivery partnerships. Also reduced repeated customer questions at peak hours

Design system: brought design and development to a single system of components and tokens, removed outdated styles and created new components with detailed specs for development

AI: built AI into the design process to explore visual directions, develop concepts and quickly produce new variations, using **Claude Code, Figma Make and AI tools** to generate images and video

June 2025 — January 2026

Product Designer · Queen Interactive Games

A B2B platform for the iGaming industry specialising in payments, bonus programmes, user retention and acquisition

Product features: designed user flows and product solutions for payments, bonus programmes, email campaigns and loyalty mechanics, improving the key retention and acquisition flows

Metrics: increased user retention by **10%**, average order value by **8%** and new user acquisition by **5%** by improving bonus mechanics, loyalty programmes and user flows. Reworked the internal admin panel and cut user verification time **from 7 to 4 minutes**

Design system: designed and maintained reusable UI components, improving interface consistency and making the design system easier to scale

AI: built AI tools into the design process for research, ideation, exploring visual directions and rapid prototyping

October 2023 — April 2025 · Moscow, Russia

Head of Sales

Additional experience: an education platform specialising in professional development and online learning

Led a team of **5–7 sales managers**, monitored KPIs, assigned areas of responsibility and tracked results at every stage of the sales funnel

Rebuilt the knowledge base with sales scripts and product information, structured onboarding materials for new hires and improved internal workflows for current and new managers

Ran onboarding and regular training for sales managers, including **SPIN Selling, needs discovery and objection handling**, helping the team improve its sales approach

Consistently exceeded the sales plan, reaching up to **130% of KPI**; personally led difficult negotiations and closed the most complex deals for education products
